Freights Hurt Nitrate Trade

Little Business Except With France Owing to Forced Advance in Prices—Supplies and Shipments Reviewed—Association Sales, Deliveries and Stocks on Hand

The nitrate of soda market has been extremely quiet during the week, with only normal business done in spot and nearby. Shortage of ships continues to be the offsetting factor to the lack of buying interest on the part of Southern cotton growers. For this reason, the present price level is maintained, viz: 95%, spot and November \$2.56, December \$2.60; January \$2.63, February \$2.64, March-May inclusive \$2.65, with 96% arrival test 5c, and 96% West Coast assay, 7½c per 100 lbs. additional. According to cable just received from the West Coast, shipments during October were as follows: 50,000 tons shipped to Europe, 45,000 tons to United States, Atlantic; 9,000 tons to United States, Pacific; 9,000 tons to Japan; 6,000 tons to Hawaii; 4,500 tons to Australia. Production during October amounted to 125,081 tons, against 227,263 tons in October, 1925.

London mail advices, dated Oct. 30, state that the continuously rising freight rates from Chile have brought about a further appreciation in prices in delivery markets and values have risen about 10 shillings

per ton during the month. The increased cost of transport has completely nullified the reduction in f. a. s. prices compared with last year, and nitrate is once more at a disadvantageous price in relation to other nitrogenous fertilizers which are not affected by the rise in freights. The higher prices now asked are proving a deterrent to business except in France, where an active business is being transacted, the disparity there between sulfate and nitrate currency prices being much less marked than last year, and the conviction is gaining ground in that country that last year's expedient of substituting sulfate of ammonia for nitrate can be attended by unfortunate results to agriculture.

Supplies in sight and those arranged for shipment from Chile to Europe between now and the end of January are scarcely equal to the volume of November, 1925-March, 1926, deliveries, and the present freight situation does not permit of these supplies being materially augmented, except at a cost considerably higher than the present selling price.

Sales by the Producers' Association during October amount to 110,000 tons, mainly for October delivery and total association sales to date for delivery during the current nitrate year commencing July are 437,000 tons, compared with 1,356,000 tons at this date a year ago.

Nitrate freights have continued to advance and owners now ask 35s for January-February and 30s for March loading, after fixtures early in October of November-December space at 25s. Only very limited quantities of liner tonnage are now offered and tramp steamers for December-January loading are unobtainable below about 45s per ton.

DYE IMPORTS UP IN VALUE AND TONNAGE

(Special to CHEMICAL MARKETS)

Washington, Nov. 15—Imports of dyes during October totaled 460,351 lbs., valued at \$406,167, against imports during September of 387,533 lbs., valued at \$322,446, and against imports during October 1925 of 537,312 lbs., valued at \$471,466. The tonnage and value of imports during October were exceeded only by February and March of this year. The five leading dyes imported were indanthrene golden orange G, brilliant indigo 4B, Ciba red R paste, Rhodamine B extra, Alizarin synthetic.

Benzol exports during September totaled 18,167,243 pounds, valued at \$729,112. Crude coal-tar exports during the same month were 4,779 barrels valued at \$14,230 and coal-tar pitch 1,997 barrels, valued at \$9,278. September exports of "other crude distillates" amounted to 2,425,691 pounds, valued at \$53,098.

T. H. Bennett, of Semet-Solvay Co., has taken the position left vacant by the resignation of O. S. Doolittle. The sales offices of the company have been moved from 40 Rector st., to 61 Broadway, 31st floor.

October Statistics (in tons)

QUALITY

SULPHURIC ACID

OIL OF VITRIOL

OLEUM

MIXED ACID

BATTERY ACID

The General Chemical Company's vast production of Standard Purity Sulphuric Acid is distributed by tank car, tank truck, and in drums and carboys from works and stations from coast to coast.

Its uniform high quality induces standardization of the processes in which it is used.

Generally speaking, the quality of General Chemical Company's products is established by the requirements of the trade. That is to say, the consuming industry writes the specifications which distinguish a chemical product best suited to its needs. Thus it becomes the responsibility of General Chemical Company to maintain that quality absolutely, so long as those particular specifications govern. And this is an achievement possible only with organization, equipment, resources and experience such as General Chemical Company commands.

HERTY RESIGNS FROM S. O. C. M. A. PRESIDENCY

Dr. Charles H. Herty has resigned as president of Synthetic Organic Chemical Manufacturers' Association effective last Monday when he took up his new work as advisor to the Chemical Foundation, assisting Francis P. Garvan, president of the Foundation. Dr. Herty has been president of Synthetic Manufacturers organization since its inception in 1921.

No successor will be named to Mr. Herty's former position until the annual meeting of Synthetic Manufacturers' Association to be held on Dec. 10, according to a statement by August Merz, chairman of the Board of Governors of the association. In the meanwhile the affairs of the association will be directed by an executive committee

Charles H. Herty

named by Mr. Merz, consisting of the following members: S. P. Rigney, of Roessler & Hasslacher Chemical Co., chairman, William Harrington, of E. I. Du Pont de Nemours & Co., Dr. E. H. Killheffer, of Newport Chemical Works, and August Merz, ex-officio.

The following statement was issued by Mr. Herty:

"During the five years' existence of the Synthetic Organic Chemical Manufacturers' Association the industry has become firmly established, not only in scientific and manufacturing skill, but also in public understanding, esteem and goodwill. It needs now only to carry on.

"The recent unanimous decision of the United States Supreme Court upholding completely the validity of the sale of the German patents to the Chemical Foundation opens innumerable avenues of useful public service for that unique organization.

"Mr. Garvan, the President of the Foundation, feels that the lawyer and the chemist should join hands

in this great work. He has therefore invited me to devote my full time to the work of advisor to the Chemical Foundation. I have gladly accepted, in the conviction that I could ask no better opportunity for contributing everything in my power to 'the advancement of chemical and allied science and industry in the United States,' as expressed in the charter of the Foundation."

G. A. Wharry, formerly vice-president and New York sales manager of E. R. Smead & Co., has organized G. A. Wharry & Co., and is carrying on a brokerage business in chinawood oil, paint and varnish materials and vegetable oils, with offices at 25 Beaver st., New York.

H. H. Rosenthal Co. moved its offices yesterday to larger quarters on the 19th floor of the same building in which the company has always been located, 15 Park Row, New York. Telephone numbers are unchanged.

Richard C. Hoy, formerly with National Aniline, has resigned as general sales manager of Rice & Hutchins, Inc., Boston, and is completing his book on "Fundamentals of Sales Management."

GET PICRIC ACID CLAIM

(Special to CHEMICAL MARKETS)

Washington, D. C., Nov. 16 — The picric acid claim growing out of a plan to establish with Government aid a plant in Arkansas during the closing days of the war, has been compromised for \$215,000.

During 1918 the Government advanced to Everly M. Davis Chemical Corp. \$750,000 for the erection of a picric acid plant in Arkansas. The Government was to receive certain quantities of the acid manufactured by the plant. Before the contract was completed, the armistice was signed, and shortly thereafter the Davis company became bankrupt. This company, with the approval of the War Department, has received certain moneys. The Government was protected by the bond of National Surety Co. The Davis company returned to the Government the funds advanced to it, except \$220,000, of which \$50,000 represented interest. The Government looked to the National Surety Co. for reimbursement. A compromise of \$215,000 was made by the Surety company, and to avoid further litigation, the compromise was accepted by the Department of Justice, the War and Treasury Departments coinciding.

[Markets & Prices]

SODIUM PRUSSATE CONTRACTS ADVANCED 1c LB.

Makers Name 11c@11¼c lb for Next Year's Business—Spot Price Advanced to 11¼c lb—Market Abroad Firm With Only Small Offerings—Ammonium Chloride and Oxalic Acid Easier—Tin Salts Advanced—Copper Sulfate Steady—No Alkali Announcement—Benzene Easy—Toluene Firm—Intermediates Steady But Dull

Advanced		
Glycerin, Dynamite, 1c lb.	Sodium Prussate, 1¼c lb.	Tin Bichloride, 65c 100 lbs.
Glycerin, Soap Lye, ½c lb.	Tin Crystals, 1½c lb.	Tin Tetrachloride, 1¼c lb.
Declined		
Ammonium Chloride White, Imp. ½c lb.	Greases, choice white, ¼c lb.	
Chinawood Oil, spot bbls. ¾c lb.	Cottonseed Oil, crude, ½c lb.	Linseed Oil, spot bbls. 0.2c lb.
Chinawood Oil, Coast tanks, ¾c lb.	Cottonseed Oil, PSY, ½c lb.	Tallow, City Extra, ¾c lb.

Outstanding in industrial chemicals during the week was sodium prussate. As has been indicated for some time past, the market abroad is very firm and parcels for import are scarce. While some makers are still withholding quotations for next year's business, at least one names firm prices of 11c @11¼c lb at works as to quantity, which is 1c lb above last year's figures. White ammonium chloride is in an easier position and prices are back to where they were they were before the shortage. Oxalic acid has also eased somewhat, and although quotations are unchanged, makers are supplying an increasing amount of the trade.

Light oil distillates remain unchanged in position. Benzene presents a weak tone, although open quotations are unchanged. At least one gasoline blender now using benzene will discontinue the use of benzene when present contracts expire. Solvent naphtha and xylene are in free supply. Toluene remains the only strong item in the group. Pyridine remains lifeless. Naphthalene is moderately active on contract closings.

Intermediates are without definite change and demand continues spasmodic. The past week has been quite dull. Para-nitroaniline is firm at the recent advance and contracts are being closed at present quotations. No further break has occurred in aniline oil or any of the main products.

Activity last week in the oil market was again rather limited with the principal changes occurring in Chinawood oil and linseed oil. Both were lower last week, though in the case of linseed the primary markets showed signs of strength at the opening of this week. Chinawood continues in small inquiry and the undertone is none too strong. Cottonseed both crude and P.S.Y. was lower on a continued routine in-

terest. Olive oil is still the strong feature of the market with sellers holding firm at the previous levels and little supplies available. Foots are also firm and in some demand. Animal fats and greases have shown no signs of recovering from the declines of the past two weeks.

INDUSTRIAL CHEMICALS

Acid Acetic—Makers generally maintain that prices are firmer and more nearly on schedule than at any time since the break occurred.

Acid Oxalic—Makers are in a better position and are supplying a greater portion of the demand resulting in an easier market. Quotations are unchanged.

Barium Carbonate—Spot goods are changing hands at \$47.00 ton for 5-ton lots.

Copper Sulfate—Makers are firm at unchanged prices, due to continued active demand.

Glycerin—Dynamite is higher at 27c lb; saponification is easier at 20¼c lb; and soap lye is up to 18½c lb. Anti-freeze demand is expected to maintain the market at close to current prices.

Soda Caustic—Makers continue to compete sharply for contract business at prices under last year's figures. No definite schedule has been announced.

Sodium Prussate—Although some makers have not as yet announced contract prices for 1927 contracts, at least one names a figure of 11c@11¼c lb as to quantity and this is understood to be agreeable to all makers. The firmness of the foreign market with import offerings scarce is the cause of the advance. Spot goods are now quoted at 11¼c lb a works. During the week, 5 tons of imported material were offered for shipment at 10½c lb and this was considered a good buy. The shortage of raw materials due to the English coal

strike has been reported as responsible for the strength of the foreign market, but it does not appear as though this would influence all countries.

Tin Salts—Makers name higher prices following the advances in the market for the metal. Crystals are quoted at 48c lb in barrels, bichloride solution at 20¼c lb, and tetrachloride at 41c lb.

CRUDES AND INTERMEDIATES

Benzene—Market presents weak tone. One large user of motor benzene will discontinue the use of benzene when present contracts expire. Open quotations are unchanged but second-hand offerings are causing sharp shading by first hands.

Solvent Naphtha—Supplies are freely offered and market is none too steady.

OILS AND FATS

Chinawood Oil—Prices in all quarters are lower this week on the quiet state of the spot market. Spot bbls. are quoted at 15½c@15¾c lb; tanks on the Coast at 12½c lb for Nov.-Dec. shipment and 11½c lb for Jan.-Feb.-March shipment.

Cottonseed Oil—Spot oil was off again at the beginning of this week with offerings heard at 8c lb. Sales were not large and the general tone of the market easy. Crude oil at the mills is quoted at 6½c lb.

Lard Oil—A reduction was recorded in edible prime oil over last week and sales have been made at 15½c lb. All other grades of lard oil are unchanged on a quiet market.

Linseed Oil—Crushers have reduced the price on spot oil in barrels to 10.7c lb, although there is an indication of strength both at Duluth and the Argentine, where the markets advanced over last week end. Consuming interest here is only fair.

Olive Oil—Retains its tight position at \$1.50@\$1.55 gal. on spot with limited offerings visible. Foots are moving well at 9½c lb on spot with the same figure reported on futures from Spain.

Red Oil—While producers continue to quote 10c lb and 10½c lb for distilled and saponified, it is admitted that these prices will be shaded on firm orders of any size.

Tallow—Leading sellers here have reduced their prices on City extra to 7¼c lb on the continuation of routine business.

TURPENTINE REACTS UPWARD AS ROSIN DECLINES

Higher This Week Both Here and at Savannah—Rosin Lower—Dried Blood at Chicago Sharply Higher—Spot Blood Unchanged—Fish Scrap Off a Bit—Nitrate and Tankage Quiet—Tanning Materials Show Improvement

Advanced		
Albumen, Egg, spot, 1c lb.	Carnauba Wax, No. 2, spot 5c lb	Turpentine, spot, 3c gal.
Blood, dried, Chicago, 40c unit	Divi Divi, ship, \$1.00 ton	Myrobalans, R2, J2, 50c ton.
	Copal Gum, Pale E.L., 1c lb.	
Declined		
Blood, dried, S. A., 5c unit	Rosin, B, D, H, I, 40c 280 lbs.	M, N, 45c 280 lbs.
Fish Scrap, works 5c unit	E, F, G, 30c 280 lbs.	WG, 70c 280 lbs.
Tankage, S. A., 10c unit	K, 35c 280 lbs.	

Turpentine both on spot and at the primary markets registered a recovery over last week. After its recent sharp decline this advance was not unlooked for here and a better inquiry for export was responsible for the movement at the source. Rosins were again lower, but receipts are gradually growing less and the market presents a firm undertone.

Outstanding in the fertilizer market last week was the sharp advance in Chicago dried blood. This advance is attributed to a better demand for feeding purposes. Fish scrap at the factories was reduced 5c unit, but the reduction was not indicative of any marked weakness. Tankage was quiet as was nitrate of soda. There has been a better inquiry for tanning materials over the past week with advances in shipment prices noted for valonia. Otherwise markets were generally quiet and unchanged.

Albumen—Edible egg albumen is steadier on spot at 89c@91c lb with the Chinese mark showing a firmer tone. No changes are reported on vegetable or blood albumens.

Blood—The Chicago market took a sharp upward turn last week on good sales to the feeding trade and is now quoted at \$4.35 per unit. The New York market is unchanged and routine at \$3.85 unit. South American is off a bit to \$3.85 unit on routine interest.

Carnauba Wax—The strength in No. 1 yellow has been reflected in No. 2 to the extent that sellers are now asking 65c@67c lb for No. 2 with limited supplies available.

Fish Scrap—The price at the fish factories shows a decline of 5c unit and is now quoted at \$4.15 and 10c unit, on a fair consuming interest.

Rosin—Although showing further declines over last week here the market is fairly steady. Primary market stocks are not believed large and the receipts will diminish with the coming of cold weather. Current quotations are: B, D, \$12.75; E, F, G, H, I, \$12.90; K, M, \$13.00; N, \$13.70; WG, \$14.70; WW, \$16.60.

Turpentine—Locally the turpentine market showed advances for the week of 3c gal., probably a reflection of the firmer position of the primary market. The demand is only fairly good, but prices are steady at 90½c@94½c gal.

Valonia—Prices on all grades have been advanced rather sharply for shipment to \$39.00@\$40.00 ton for cups; \$56.00@\$57.00 ton for beards and \$42.50@\$43.00 ton for mixtures. Consuming interest is improving.

(Special to CHEMICAL MARKETS)

Savannah, Ga., Nov. 15—On an advance of about 2c gal. on Saturday the turpentine market closed firm at 86c gal. with offerings of 275 barrels to one buyer. Inquiry was good, but aside from this sale, interest was on the basis of 84½c

gal. Saturday's closing showed an advance of 5c gal. over the previous week's close. There has been considerable activity in export business with the loadings for the last half of the month expected to be 5,000 barrels. After this month the daily receipts should decline, but stocks are sufficient to care for future wants. American sellers continue to notice the competition from French turpentine in the European market. Receipts of turpentine last week were 2,456 bbls.; sales reported 1,040 bbls.; shipments 905 bbls. Savannah stocks are 17,847 bbls.

The rosin market closed firm with all offerings of 2,452 barrels sold to one buyer. The declines registered early Saturday put prices at the lowest level they have reached since May 15. Three of the largest exporters bought the offerings at the low levels, and as more competition for stocks is expected, a partial recovery is not unlikely. Factors here are of the opinion that the present is a very opportune time to buy rosin. Receipts last week were 10,054 bbls.; sales reported, 6,088 bbls.; shipments, 3,148 bbls.; stocks 71,377 bbls. Current quotations are: B, D, \$11.05; E, F, G, H, I, K, M, \$11.15; N, \$11.90; WG, \$12.90; WW, \$15.05.

Serving Industry on a Satisfactory Basis

TO BORROW a term—the products of Electro Bleaching Gas Company and Niagara Alkali Company are manufactured to the "dies" furnished by industry. In other words, the chemicals bearing these trade marks conform exactly to your requirements.

You will find that Electro Bleaching Gas and Niagara Alkali chemicals meet your ideas of quality—that our desire to please takes the form of interested service.

BRITISH MERGER STOCK UP

Shares of British Dyestuffs Corp., Brunner Mond & Co. and Nobel Industries, which have been strong for some time in anticipation of a merger, did not rise so sharply in the following week as United Alkali's, whose name had not been associated with the merger. How quotations moved before and after the directors' statement is shown in the following table:

	Oct. 1	Oct. 21	Oct. 26
British Dyestuffs	138 9d	148	178 9d
Brunner Mond	36s	40s	41s
Nobel	29s 3d	32s 6d	35s 3d
United Alkali	30s	30s 6d	36s 3d

Authorized capital of the four companies exceeds \$235,000,000. Issued capital aggregates \$190,000,000, which will be the capitalization of the new company. Sir Alfred Mond, now chairman of Brunner Mond, will be chairman of the combine, and Sir Harry McGowan, chairman of Nobel Industries, will be president and vice-chairman.

Air Reduction Co. will acquire an interest in Commercial Acetylene Supply Co., Inc., accomplished through the issuance of 9,232 shares of capital stock of Air Reduction, without par value, to acquire up to 3,357 shares of the common capital stock, par value \$100, of Commercial Acetylene Supply Co., at the rate of two and three-quarters shares of capital stock for each common share of the Commercial concern.

Universal Gypsum & Lime Co., Chicago, elected the following offices at a recent meeting of directors: President L. M. Palmer, Jr., formerly president of Palmer Lime, was to succeed W. E. Shearer, who becomes chairman of the board; first vice-president, Oliver Mitchel; second vice-president, Gleason G. King; treasurer, C. F. Kalar; secretary and assistant treasurer, F. G. Krumholz.

U. S. Gypsum Co. has declared a dividend of 35 per cent in common stock and an extra cash payment of \$1.40 a share on common, in addition to the regular quarterly dividends of 40 per cent cash on common and 1 3/4 per cent on preferred, all payable Dec. 31 to stockholders of record Dec. 4.

Edwin M. Squier, vice-president New Jersey Zinc Co., and Rahway Savings Bank, and an official in several New York City corporations, died Nov. 9 of pneumonia. He was 74.

R. S. Shainwald vice-president and general manager of Paraffine Co., San Francisco, is making a business trip to New York.

ABEL TO RECEIVE MEDAL

The Willard Gibbs Gold Medal will be awarded this year to Prof. J. J. Abel, Medical School of Johns Hopkins University. The medal is given annually by the Chicago Section of American Chemical Society to a chemist whose work in either pure or applied chemistry has received world-wide recognition.

O. C. Harn, National Lead Co., New York, has been elected a director of Audit Bureau of Circulation, being chosen by the advertiser group of members. The by-laws were changed to make the number of directors twenty-five instead of twenty-one. The advertising group now has 13 members on the board instead of 11.

National Cottonseed Products Corp., which has 18 crushing mills, 52 cotton gins and a refinery, is offering bonds bearing warrants entitling purchasers to buy common stock at low prices, to yield 6 1/2%.

C. A. Zacher, assistant sales manager Monsanto Chemical Works, St. Louis, was married to Miss Elizabeth Ann Wander of St. Louis on Nov. 9.

Lowe P. Siddous, formerly traffic manager of William Cooper & Nephews, Chicago, has been appointed assistant sales manager.

NOBEL CHEMISTRY PRIZES

Nobel prize for chemistry in 1925 has been awarded to Dr. Richard Zsigmondy, professor of inorganic chemistry at Goettingen University, Goettingen, Germany. The chemistry prize for 1926 was presented to Prof. Theodore Svedberg, University of Upsala, Sweden.

Union Manganese Co., Johannesburg, South Africa, and two American steel companies have signed an agreement under which the American companies obtain the right to work manganese deposits near Postmasburg. It is said a company will be formed in the United States to work the deposits.

William Cooper & Nephews recently completed an order for 34 million gals. 90% benzene cleared from New Orleans. They are now planning to export a second cargo of one million gallons on Dec. 10.

Passaic Worsted Spinning Co., Passaic, N. J., has settled the strike with its employees, recognizing the Union. The action marks the first break in the manufacturers' group.

U. S. Industrial Chemical Co. is now manufacturing butyl acetate at the company's plant at Peoria, Ill. This is a permanent arrangement.

BARIUM CHLORIDE

GRASELLI GRADE

A Standard Held High for 87 Years

LEADERSHIP

What establishes it for a firm or a product? Certainly not unsupported claims. Nor yet promises. The answer is — **PERFORMANCE.** And performance over a long enough period of time to test endurance

In chemicals "GRASELLI GRADE" has won leadership as a Quality Pledge because of the rich background of 87 years of **SERVICE** back of it. Few concerns in any line can match that record.
